BHARATH CHAND MORAMPUDI

SOFTWARE ENGINEER | JAVA / SPRING BOOT | BACKEND & FULL-STACK

Houston, TX | bharathmorampudi159@gmail.com | github.com/bharath4980 | linkedin.com/in/bharath-morampudi

PROFESSIONAL SUMMARY

Software Engineer with approximately three years of professional experience delivering Java/Spring Boot services and React applications. Experienced in REST API design, SQL performance optimization, authentication, automated testing, and CI/CD. Recent hands-on delivery with TypeScript, PostgreSQL, Docker, database migrations, and production deployment.

PROFESSIONAL EXPERIENCE

ValueLabs | Software Engineer

Aug 2023 - Jul 2024

- Built and tested 10+ REST APIs using Java, Spring Boot, Spring Data JPA, and MySQL for enterprise workflows and reporting.
- Optimized SQL/database operations, improving average API response time by approximately 15-20%; created reusable React dashboard components.
- Strengthened authentication, role-based access control, validation and exception handling; expanded JUnit tests and supported defect resolution and Agile releases.

Darwinbox | Software Engineer

Jun 2021 - May 2023

- Delivered Java/Spring Boot and React enterprise HR workflows supporting 10K+ monthly user interactions.
- Built or enhanced 20+ REST endpoints with Spring MVC and Hibernate/JPA; worked on SQL indexing, authorization, and API performance.
- Developed 15+ reusable React components and contributed to production debugging, code reviews, testing and biweekly releases.

SELECTED PROJECTS

DevTrack | Full-stack job application workspace

Java 21, Spring Boot, React, TypeScript, Neon PostgreSQL, Flyway, Docker, GitHub Actions. Designed and deployed a multi-user application with owner-scoped CRUD, search, pipeline board, interview rounds, follow-ups and analytics. Implemented session security, BCrypt, CSRF, migrations, and H2/PostgreSQL plus desktop/mobile Playwright CI. Live demo | Source.

MindMetrics | UHCL team capstone

Python, PyTorch, scikit-learn, FastAPI, React. Contributed the Logistic Regression workflow, training-fold preprocessing and five-fold GroupKFold validation by participant. Generated metrics and confusion matrices for the team's model-comparison interface. Source and methodology.

TECHNICAL SKILLS

Languages:	Java, Python, TypeScript, JavaScript, SQL
Backend:	Spring Boot, Spring MVC, Spring Security, JPA/Hibernate, REST APIs, FastAPI
Frontend & Data:	React, PostgreSQL, MySQL, Oracle Database, Flyway
Testing & DevOps:	JUnit, integration testing, Playwright, Postman, Docker, GitHub Actions, Jenkins, Git, Maven
Applied ML:	PyTorch, scikit-learn, pandas, GroupKFold cross-validation

EDUCATION

M.S. Computer Science | University of Houston–Clear Lake
